About Me

I am a software engineer and developer, I am interested in developing websites, and I contribute to highly collaborative work environments and finding solutions to problems. I have some experience developing websites using React, MongoDB, Express, and Node js, and Good knowledge of web design as a UI/UX designer, I am also interested in developing Mobile application

Experience

I have experience developing websites in HTML/CSS & Javascript I have done a lot of projects at the university but nowadays I am interested in developing websites in React js as frontend and Node js as backend, I developed a Portfolio website in React as a frontend, and then a few days ago I developed Book store web app on MERN stack, React js as frontend, Node js, and MongoDB as backend, I got a lot of experience on building these project in the university, I have enough experience building website as MERN STACK DEVELOPER.
